Accelerating the Construction of a New Development Pattern

Yu Miaojie

Abstract: Chinese modernization is socialist modernization pursued under the leadership of the Communist Party of China. It contains elements that are common to the modernization processes of all countries, but it is more characterized by features that are unique to the Chinese context. The report of the 20th Party Congress points out that Chinese path to modernization includes five profound connotations, namely, it is the modernization of a huge population, of common prosperity for all, of material and cultural-ethical advancement, of harmony between humanity and nature, and of peaceful development. At present, China's economy has entered a new stage of development. Comprehensively implementing the new development concept that is innovative, coordinated, green, open and shared, and accelerating the establishment of a development pattern whereby domestic and foreign markets can boost each other, with the domestic market as the mainstay, is a necessary condition and a necessary path to promote Chinese modernization. Therefore, we need to proceed from the new development stage, implement the new development concept, build a new development pattern, promote high-quality development, and comprehensively advance the great rejuvenation of the Chinese nation with Chinese modernization.
